PROFESSIONAL SUMMARY

A result-oriented Communication and Project Management Specialist with proven expertise in stakeholder engagement, strategic communication, and driving cross-functional collaboration to deliver impactful digital solutions. Adept at translating complex concepts into actionable strategies, optimizing project delivery, and fostering transparency to achieve business goals. Skilled in aligning user-centric solutions with organizational objectives to drive growth and innovation.

WORK EXPERIENCE

Agbedus Consult, Accra, Ghana | Project Manager

October 2024 - Present

- Designed comprehensive communication strategies to facilitate stakeholder engagement.
- Implemented comprehensive communication strategies to facilitate easier and quicker project updates.
- Regularly monitored project milestones, evaluated outcomes, and prepared detailed reports to measure progress and identify areas for improvement.
- Trained the team on Agile methodologies, ensuring efficient communication and collaboration.
- Conducted evaluations to assess project impacts and produced actionable insights for decision-making.
- Fostered transparency by maintaining open communication channels with clients and stakeholders.

Hubtel Ghana, Accra, Ghana | Product Manager

September 2023 - Present

- Led strategic communication efforts to keep stakeholders informed about product progress and releases.
- Worked on a feedback and performance framework to track the performance of B2B digital products and provide actionable feedback for optimization.
- Conducted user research and usability testing, transforming insights into reports for cross-functional teams.
- Presented findings and progress updates to leadership, ensuring alignment on product vision and goals.
- Collaborated with marketing and operations teams to design effective communication strategies for product adoption.

Turntabl Ghana, Accra, Ghana | Software Engineer

January 2021 – August 2023

- Developed a data generation system for a data anonymizer's machine learning model, increasing data processing efficiency.
- Engineered a real-time trading system using SpringBoot and AngularJS, facilitating seamless trading operations and boosting user satisfaction.
- Advanced system performance and functionality through the development of intricate algorithms and flowcharts for software applications.
- Enhanced code quality and reduced recurring errors by engaging in pair-programming and producing clean, efficient code in Java.

Morgan Stanley, UK - Remote | Software Engineer (Contingent Staff) April 2021 – May 2022

- Launched and rigorously tested new features for distributed systems like a file-based cache and notification system, significantly improving performance.
- Promptly identified and resolved critical issues, documenting solutions to ensure a reduction in system downtime and added overall stability, fostering seamless development processes.

Amalitech Services, Takoradi, Ghana | Software Engineer

July 2020 – December 2020

- Facilitated project alignment with user needs through in-depth user research and data analysis, ensuring project feasibility and meeting user requirements.
- Refined website performance and responsiveness by developing diverse frontend pages with ReactJS, TypeScript, Redux, and React Query.
- Increased communication effectiveness and user engagement by designing and integrating a seamless email template with the Django backend.

Amalitech Academy, Takoradi, Ghana | SWE Trainee

July 2019 – July 2020

- Led project discovery and delivery and enforcing SDLC practices and agile methodologies (Scrum).
- Conducted manual testing, identifying and documenting software defects, improving product quality.
- Promoted continuous learning and skill development through knowledge-sharing sessions, improving overall team competence.

Total Energies, Accra, Ghana | IT Systems NSP

September 2017 – October 2018

- Monitored the success of IT system migrations, preparing reports on usage and training effectiveness.
- Communicated regularly with teams across departments to ensure smooth adoption of new technologies.
- Evaluated IT systems' performance post-deployment, providing insights to optimize service delivery.
- Improved SAP user experience through active support and maintenance, reducing system downtime.
